From stakeholder analysis, to sketches, implementation and maintenance. A full web solution for the charity aiming to unite communities in developing countries with football kits

Droitwich Spa
High School

Motivational Presentation to 6th Form Students on 'Why University Is Right For You'

Swansea University

Department representative to prospective students

Interests/Skills

When I'm in an efficient frame of mind I love to work on my app development (Android & iPhone) and freelance web design which I have done as a side project from around 2011. I'm endlessly fascinated with all the possible solutions I can provide for people with website needs and am proud of the fact I often do them pro bono to simply further myself as a developer.

I have experience with HTML/CSS/JavaScript & jQuery I also have extensive Java programming experience as I used this language to write my undergraduate dissertation project and throughout my Masters Degree

In my downtime I will often play my guitar endlessly. I play acoustic, electric and bass guitar and they act as a fantastic channel for creativity.

Along with being a regularly gym go-er I love playing football with my intramural football team of which I play striker for. It is something I came to late in my life, and has taught me so much about how teamwork can make or break a plan.
